OFFICIAL PAPER OF THE CITY.

PRESIDENT'S MESSAGE.

Fellow-citizens of the Senate and House of Representatives:

Again the blessings of health and abundant harvests claim our profoundest gratitude to Almighty God. The condition of our foreign affairs is

reasonably satisfactory. Mexico continues to be the theatre of civil war. While our political relations with that country have undergone no an open question, the maritime powers, change, we have at the same time strictly with the light they now enjoy, would not with that country have undergone no maintained neutrality between the bellig-

It is a source of much satisfaction | during the last year than they were be- timates of the Secretary of the Treasury that the difficulties which for a moment excited some political apprehensions, and caused a losing of the inter-oceanic transit route, have been umleably adjusted, and that there is a good prospect that the route will soon be re-opened, with an increase of capacity and adaptation. We

opened with Liberia, and it gives us a pleasing view of social and political progress in that Republic. It may be expected to derive new vigor from American influence, improved by the rapid disappearanco of slavery in the United States. I solicit your authority to furnish the Republie a gunboat at a moderate cost, to be reimbursed to the United States by installments. Such a vessel is needed for the safety of that State against the native African race, and in Liberian hands it would be more effective in arcesting the African Blave trade than a squadron in our own hands. The possession of the least organised naval force would stimulate a generous ambition in the Republic, and the confidence which we should manifest by furnishing it, would win forhearance and favor towards the colony from all civilized nations.

The proposed overland telegraph between America and Europe, by the way of Behring Straits and Artic Russia, which was sanctioned by Congress at the Instactsion, has been undertaken under very favorable circumstances by an association of American citizens, with the cordial good will and support, as well of this Government as of those of Great Britian and Russia. Assurances have been continued from most of the South America States of their high appreciation of the enterprise, and their readiness to co-operate in constructing lines to that world-enviroling communication.

I learn with much satisfaction that the noble design of a telegraphic communication between the eastern coast of America and Great Britian has been removed, with full expectations of its early accomplishment. Thus it is hoped that, with the return of domestic peace, the country will be able to resume with energy and advantage her former high career of commerce and civilzation.

Our very popular and estimable representative in Egypt died in April last. An unpleasant altereation which arose between the temporary incumbent of the office and the Government of the Pacha, resulted in a suspension of intercourse. This was promptly corrected on the arrival of the successor of the Consulate. Our relations with Egypt, as well as our relations with the Barbary Powers are entirely satisfactory. The rebellion which has so long been in progress in China has at last been suppressed with the co-operating good offices of this Covernment and of the other foreign commercial States. The judicial consular establishment has become very difficult and oncrous, and it'will'need legislative regulation to adapt it to the extension of our commerce and to the more intimate intercourse which has been instituted with the Government and people of that vast Empire. China seems to be accopting with hearty good will the conventional laws which regulate commerce and social intercourse among the Western na-

Owing to the peculiar situation of Japan and the anomalous form of its Govern ment, the nation of that Empire in perform ing treaty stipulations is inconstant and enpricious. The election has exhibited another fact, not less valuable to be known-the fact it is believed that under the present organ-ization the management of the Indians most important branch of the national resources, that of living men. While it is melancholy to reflect that the war has filled so many graves, and caused mourning to so many homes, it is some relief to know that, compared with the surviving, the fallen have been so few. Whole Corps, and Divisions, and Brigades, and Regiments, have formed, and fought, and dwindled and gone out of existence. A great majority of the men who composed them are

> The States regularly holding elections, York, Ohio, Oregon, Pennsylvania, Rhode Island, Vermont, West Virginia, and Wiscovsin, cast 3,928,011 votes now, against 3,870,222 then, showing an aggregate now of 3,398,211, to which is to be added thirty-three thousand seven handred and sixty-two (33,762) east now in the new States of Kansas and Nevada, which states did not vote in 1860; thus swelling the aggregate to 4,075,773 and the net inerease during the three years and a half of war to 145,751. A table is appended showing particulars. To this again should be added the number of all the soldiers in the field from Massachusetts, Rhodo Is land, New Jersey, Delaware, Indiana and California, who by the law of those states could not vote away from their homes, and which number cannot be less than 90,000. Nor yet is this all. The number in organized territories is a trifle now to what it was four years ago, while thousands of both white and black join us as the national arms press back the insurgentlines. So much is shown affirmatively and negatively by the election. It is not material to inquire how the increase has been produced. or to show that it would have been greater but for the war, which is probably true. The important fact remains demonstrated that we have more men now than we had when the war began; that we are not exhausted nor in process of exhaustion; that we are gaining strength and may, if need be, maintain the contest indefinitely. This as to men. Material is complete.

The national resources, then, are unexhausted and, as we believe, inexhaustable. The public propose to re-establish and maintain the national authority as an changed and, as we believe, unchangable. The manner of continuing the effort, remains to be chosen. On careful consideration of all the evidence accessible, it seems to me that no attempt at negotiation with the insurgent leader, could result in any good. He would accept of nothing short of the severance of the Union. His declarations to that effect are explicit and oft-repeated. He does not attempt to deceive us. He affords us no excuse to deceive ourselves. We cannot voluntarily yield it. Between nim and us the issue is distinct, simple and inflexible. OFFICIAL PAPER OF THE CITY

PRESIDENT'S MESSAGE.

Fellow-citizens of the Senate and House of Representatives :

Again the blessings of health and abundant harvests claim our profoundest gratitude to Almighty God. The condition of our foreign affairs is

reasonably satisfactory.

Mexico continues to be the theatre of civil war. While our political relations with that country have undergone no change, we have at the same time strictly maintained neutrality between the bellig-

At the request of the States of Costa Rica and Nicaragua, a competent engineer has been authorized to make a survey of the river San Juan and the port of San Juan. It is a source of much satisfaction that the difficulties which for a moment excited some political apprehensions, and caused a losing of the inter-oceanic transit route, have been amicably adjusted, and that there is a good prospect that the route will soon be re-opened, with an increase of capacity, and adaptation. We

It would be doing injustice to an important South American State, not to ne-knowledge the directness, frankness and cordiality with which the United States of Columbia have entered into intimate relations with this Government. A Claims Convention has been constituted to complete the unfinished work of the one which closed its session in 1861. The new liberal Constitution of Venezuela having gone into effect with the universal acquiescence of the people, the Government under it has been recognized, and diplomatic intercourse with it has been opened in a ferred Avis Island claim has been satisfactorily paid and discharged. Mutual payments, have been made of the claims, with Great Britain, the United States must ple against losses in the use of paper monawarded by the late juint commission for hold themselves at liberty to increase their by. Our relations are of the most friendly nature with Chili, the Argentine Republic, Costa Rica, Paragua, San Salvador and Hayti. During the past year no differences of any kind have arisen with any of these Republics, and, on the other hand, their sympathics, with the United States are constantly expressed.

The claim arising from the seizure of the cargo of the brig Macedonian in 1821 has been paid in full by the government of

Civil war continues in the Spanish port of San Domingo, apparently without a prospect of an early close.
Official corrospondonce has been freely

opened with Liberia, and it gives us a pleasing view of social and political progress in that Republic. It may be expected to derive now vigor from American influence, improved by the rapid disappearance of slavery in the United States. I solicit your authority to furnish the Repub-lic a gunboat at a moderate cost, to be reimbursed to the United States by installments. Such a vessel is needed for the safety of that State against the native African race, and in Liberian hands it would be more effective in arresting the African slave trade than a squadron in our own hands. The possession of the least organised naval force would stimulate a generous ambition in the Republic, and the confidence which we should manifest by furticities that end the Government must in every gross proceeds arising from the sale of ised naval force would stimulate a genernishing it, would win forbearance and favor towards the colony from all civilized nations.

The proposed everland telegraph between America and Europe, by the way, of Behring Straits and Artic Russic, which was sanctioned by Congress at the last session, has been undertaken under very fuvorable circumstances by an association of American citizens, with the cordial good will and support, as well of this Government as of those of Great Britian and Russia. Assurances have been continued from most of the South America States of their high appreciation of the enterprise, and adiness to co-operate in constructing lines to that world-oncircling commun-

ication. I learn with much satisfaction that the noble design of a telegraphic communica-tion between the eastern coast of America and Great Britian has been removed, with full expectations of its early accomplish-Thus it is hoped that, with the re turn of domestic peace, the country will be able to resume with energy and advantage her former high career of commerce

and civilzation. Our very popular and estimable repre sentative in Egypt died in April last. An unpleasant altereation which arose between the temporary incumbent of the office and the Government of the Pacha, resulted in a suspension of intercourse. This was promptly corrected on the arrival of the successor of the Consulute. Our relations with Egypt, as well as our relations with the Barbary Powers are entirely satisfactory. The rebellion which has so long been in progress in China has at last been suppressed with the co-operating good of fices of this Government and of the other foreign commercial States. The judicial consular ostablishment has become very difficult and onerons, and it will need legislative regulation to adapt it to the extension of our commerce and to the more intimate intercourse which has been instituted with the Government and people of that vast Empire. China seems to be accepting with hearty good will the conventlonal laws which regulate commerce and social intercourse among the Western na-

Owing to the peculiar situation of Japan and the anomalous form of its Govern ment, the action of that Empire in perform ing treaty stipulations is inconstant and onpriorous. Nevertholess, good progress has been effected by the Western powers, moving with onlightened concert. Our own pecuniary claims have been allowed or put in course of settlement, and the inland sea has been reopened to commerce. There is reason also to believe that these proceedings have increased rather than diminished the friendship of Japan to-

wards the United States. The ports of Norfolk, Fernandian and Ponnandian Ponnandian and Ponnandian and Ponnandian Ponnan The ports of Norfolk, Fernandina and Pensacola have been opened by proclamation. It is hoped that foreign merchants will now consider whether it is not more safe or profitable to themselves, as well as just to the United States, to resort to these and other open ports, than it is to pursue, through many hazards, and at vast cost a contraband trade with other ports which are closed, if not by actual military operation, at least by a lawful and effective

It is possible that if it were a new and. an open question, the maritime powers, with the light they now enjoy, would not concede the privileges of a naval belliger-eut to the insurgents of the United States, destitute, as, they are and always have that they cannot be much oppression, equally of ships and of pures and debt which they ove themselves, harbors. In view of the insecurity of life in the re-gion adjacent to the Canadian border, by recent assaults and deprodations committed by inimical and desperate persons, who are harbored there, it has been thought come in to consideration in connection with the United States, as well as the regulation of exports which were temporarily es-tablished by the reciprocity treaty of the 5th of June 1854. I desire, however, to he understood, while making this statement, that the colonial authorities are not deemed to be intentionally anjust or unriendly towards the United States, but, on the contrary, there is every reason to expect that, with the approval of the Imperial Government, they will take the necessary measures to prevent new incursions eross the border.

The act passed at the last session for the encouragement of emigration has, as far as was possible, been put into operation. It seems to need amendment, which will enable the officers of the Government to prevent the practice of frauds against the emigrants while on their way and on-their arrival in the ports, so as to secure them here a fair choice of avocations and place of sottlement. A liberal disposition towards this great national policy is manifested by most of the European States, and ought to be reciprocated on our part over and above all losses, by shipwreck or by giving the emigrants effective national in battle, of 83 vessels, 107 guns, and 42,rotection. The public debt, on the 1st day of July last, although somewhat exceeding the estimates of the Secretary of the Treasury made to Congress at the commencement of last session, falls short of the estimate of that officer made in the preceding December, as to its probable amount at the beginning of this year, by the sum of \$3,995,-This fact exhibits a satisfactory condition and conduct of the operations of the Treasury.

The National Banking system is proving to be acceptable to capitalists and to the people. On the 25th of November, five hundred and eighty National Banks had been organized, a considerable number of which were conversions from State Banks. Changes from the State system to the Na-tional system are rapidly taking place, and it is hoped that very soon there will be in the United States no bank of issue not authorized by Congress, and no bank note circulation not secured by the Government. That the Government and the people will derive general benefit from this change in the banking systems of the country, can hardly be questioned.—
The National system will create a relia ble and permanent influence in support of the national credit, and protect the pec-

The Secretary reiterates his recom-the campuigns of the armies in the field mendations, and to them the attention of since the date of the last annual message, Congress is invited. and also the operations of the several administrative bureaus of the War Department during the last year. It will also specify the measures deemed essential for the national defense, and to keep up and to supply the requisite military force.

The Report of the Secretary of the Na-vy presents a comprehensive and satisfactory exhibit of the affairs of that Department, and of the naval service. It is a subject of congratulation and landable pride to our countrymen, that a Navy of such rast proportions has been organized in so brief a period, and conducted with so much efficiency and success. The general exhibit of the Navy, including ves-sels under construction on the first of December, 1864, shows a total of 671, vessels, carrying 4,610 guns, and 510,396 tons, being an actual increase during the year, enndemned prize property thus far reported amounts to \$14,396,250.51. A large amount of such proceeds is still under adjudication and yet to be reported. The total expenditures of the Navy Departeast of the immense squadrons that have

heen called into existence from the 4th of March, 1861, to the 1st of November, 1864. are \$238,647,262.35. Your favorable consideration is invited to the various recommendations of the Secretary of the Navy, especially in regard to a navy yard and a suitable establishment for the construction and repair of iron ves sels and the machinery and armature for our ships, to which reference was made in my last annual message. Your attention Congress at the last session in respect to

Your attention is invited to the report of the Postmaster General for a detailed account of the operations and financial conpostal revenues for the year ending June 30th, 1864, amounted to \$12,438, 253,78, and the expenditures to \$12,644,786,20. The excess of expenditures over receipts being \$206,652,42.: The views presented by the Postmaster General on the subject of special grants by the Government in ervice \$28,505,599,46; for pensions and mid of the establishment of new lines of ocean mail steamships, and the policy he recomends for the development of increased commercial intercourse, with adjacent and neighboring countries should receive the careful consideration of Congress. At is of noteworthy interest that the steady expansion of population, improvement in Government institutions over the new and unoccupied portions of our country have scarcely been checked, much less impeded or destroyed by our great civil war, which

The organization and admission of the State of Novada has been completed, in conformity with the laws, and thus our excellent system is firmly established in the mountains which once seemed a barren and uninhabitable waste, between the Atlantic States and those which have grown up on the coast of the Pacific Ocean. Notwithstanding the embarrassments arising from the prevailing high prices of materials and labor, the route of the main line of the road has been definitely located for 100 miles westward from the initial point at Omaha City, Nebraska, and a preliminary location of the Pacific Railroad of California has been made from Sacramento eastward to the great bend of Muck-

Numerous discoveries of gold, silver and avey cinnibar mines have been added to to the ion. many heretofore known, and the country occupied by the Sierra Nevada and Rocky Mountains and the subordinate ranges, now teems with enterprising labor, which is richly renumerative. The Agricultural Department, under the supervision of its present energetic head, is rapidly commending itself to the great and vital interest it was created to advance. Isas peculiarly the peoples department, in which they feel more directly concerned than in any other. I commend it to the continued attention and fostering care of

longress. The war continues. Since the last an-unal message, all the important lines and positions then held by our armies have been maintained, and our armies have steadily advanced, thus liberating the States left in the rear, so that Missouri, Kentucky, Tennessee, and parts of other States, have again produced reasonably

fair erong. The most remarkable feature in the miltary operations of the year is General Sherman's attempted march of three hundred miles directly through the insurgent region. It tends to show a great increase four relative strength, that our Generaln-Chief should feel able to confront and iold in check every active force of the enony, and yet to detach a well-appointed army to move on such an expedition. The result not yet being known, conjecture in regard to it is not here indulged. Important movements have also occur ed during the year, to the effect of mouldng society for durability in the Union. Although not sure of complete success, it is so much in the right direction that 12,000 itizens in each of the States of Arkansas ind Louisiana have organized loyal. State Governments with free constitutions, and ire carnestly straggling to maintain and diainister them. The movement in the same direction, more extensive though less lefinite, in Missouri, Kentucky and Tenressee should not be overlooked. But Maryland presents the example of comolete success. Maryland is secure to Librty and Union for the future. The genius of rebellion will no more claim Marvland. Like another foul spirit being driven out, it may seek to tear her, but it will woo her no more.

At the last session of Congress a proposed amendment of the Constitution, bolishing slavery throughout the United States, passed the Senate, but failed for ack of the requisite two-third vote in the House of Representatives. Although the present is the same Congress and nearly the same members without questioning the wisdom or patriotof those who stood in opposition, I venture to recommend the reconsideration and passage of the measure at the present session. Of course the abstract

judgment may be affected by it. It is the voice of the people—now for the first time heard upon the question. In a great national crisis like ours, unanimity of action among those seeking a common end is very desirable—almost indispensible, and yet no approach to such unanimity is attainable unless some deference shall be paid to the will of the majority—simply because it is the will of the majority.

In this case the common end is the main-

tenance of the Union, and among the means to secure that end, such will, through the election, is most clearly declared in fa yor of such constitutional amendment The most reliable indication of public purpose in this country is derived through our popular elections. Judging by the recent cauvass and its result, the purpose of the people within the loyal States to maintain the integrity of the Union was never more carly unanimous than now. The extraordinary calmness and good order with which the millions of voters met and ming-led at the polls gave strong assurance of this. Not only those who supported the Union ticket, so called, but a great majority of the opposing party also, may be airly claimed to entertain and to be actuated by the same purpose. It is an unanswerable argument to this effect, that no candidate for any office whatever, high or low, has ventured to seek votes on the avowal that he was for giving up the Un-

There has been much impugning of motives, and much heated controversy, as to the proper means and best mode of advancing the Union cause, but in the distinct issue of Union or no Union, the politicians have shown their instinctive knowledge that there is no diversity among the people. In awarding the people the fair pportunity of showing one to another and to the world, this firmness and unanimity of purpose, the election has been of vast value to the national cause.

The election has exhibited another fact. not less valuable to be known-the fact it is believed that under the present organ- that we do not approach exhaustion in the ization the management of the Indians most important branch of the national rethere will be attended with a reasonable sources, that of living men. While it is melancholy to reflect that the war has filled so many graves, and caused mourning to so many homes, it is some relief to know, that, compared with the surviving, the fal len have been so few. Whole Gorps, and Divisions, and Brigades, and Regiments, have formed, and fought, and dwindled, and gone out of existence. A great maof the men who composed them are still living, The same is true of the na-val service. The election returns prove this so. Many voters could not else be

A table is appended showing particulars. To this again should the number of all the soldiers in be added the field from Massachusetts. Rhodo Island, New Jersey, Delaware, Indiana and . So nuch is shown affirmatively and negatively by the election. It is not malerial to inquire how the increase has been produced or to show that it would have been greater but for the war, which is probably true. The important fact remains demonstrated that we have more men now than we had when the war began; that we are not exlinusted nor in process of exhaustion; that we are gaining strength and may, if need be, maintain the contest indefinitely This as to men. Material is complete. and more abundant than ever.

The national resources, then, are nnex musted and, as we believe, inexhaustable The public propose to re-establish and maintain the national authority as unchanged and, as we believe, unchangable. The manner of continuing the effort, remains to be chosen. On careful consider ation of all the evidence accessible, it seems to me that no attempt at negotiation with the insurgent leader, could re-

sult in any good. He would accept of nothing short of the severance of the Union. His declarations to that effect' are explicit and 'oft-repeated. He does not attempt to deceive us. He affords us no excuse to deceive ourselves. We cannot voluntarily yield it. Between him and us the issue is distinct, simple and inflexible. It is an issue which can only be tried by war, and decided by vic-If we yield we are beaten; if the southern people fail him, he is beat-en-either way it would be the victory

What is true, however, of him who reads the insurgentenus, is not necessarily, true of those whe follow, although he cannot be necessarily, true of those whe know, alroady desire peace and roundom. The number of such, may harriest. They can at any moment have peace, simply by laying down their arms and submitting to the national surhority under the constitution.

After so much, the Government could not if it would mainting a way regulate them. The loval populo would

maintain a war against them. The loyal people would not sustain or allow it. If questions should rough, we would adjust them by the perceful means of legis not sustain or allow it. If questions storial romain, we would adjust them by the penceful means of legistion, conference, courts and votes.

WEDNESDAY, DEC. 7, 1884.

. The President's Message. We anticipate the usual time of publication by several hours to-day, in order to lay before our readers the annual Message of President Lincoln which was sent to Congress yesterday afternoon. It is safe to say that no message of any former President was ever looked for with as much solicitude and enrosity, as the one which is? published herewith: No former message was written under such peculiar and important circumstances. While the sages. Governor Vance, of North Carolination was convulsed with internal dissen- | na, says it is impossible to execute the sions, and the whole continent felt the laws in the interior of that State, owing varthquake shock of contending armies, a | to the strong gangs of deserters from the highly excitable people were called upon robel army, who are committing numberto pronounce direct judgment upon the less depredations. He also is uneasy for policy of the government in the past, and Wilmington. Governor Watts, of Alaindicate the future course which they desire | buma, is fiercely opposed to the arming of their public servants to pursue. And after | negroes, or permitting the Confederate authe exciting canvass is over, both the thorities to usurp the power of freeing friends and the enemies of the them for their services. re-elected Chief Magistrate, are anxious to see how far he is to be governed in his administrative policy by the wishes of the majority, and whether or not he will have any regard for the opinions of that large class of persons who protested against his election at the ballot-box. We believe the Message will please all classes of honest, national men who really desire the perpetuity of our republican institutions and the far southern localities on and about the triumph of law and order over rebellion 22d ult. A man was frozen to death in and discord. While he indicates his pur- Nashville, and in Vicksburg the mud pose to firmly pursue the official path pointed out to him by the commanding voice of an overwhelming majority of free--men, at the same time he treats the opinions and feelings of his opponents with the same high respect and deference that has always characterized the conduct of Abraham Lincoln. Upon the great subject of domestic slavery, and the questions incident thereto, the Message preaches nothing incompatible with the pure gospel of liberty and universal freedom to all mankind. While the nation has reason to thank God that the people had virtue enough to stand firm in the true faith during the terrible crises through which we have been so rapidly passing, let them remember also, in their thankfullness that we have a President who will carry out their wishes, and who takes no steps backward, however slow we

may think him in going forward. In these days of long-winded and yerbose statesmen, the Message is a remarkably brief document, and is so simple and plainly put, that he who runs may read, and reading, may understand. We commend it to the reader's attentive perusal, deferring further comment to another day.

The New York Tribune says, "The reason why Brake's Plantation litters are so universally used and have such an immense sale, is that they are always made up to the original standard, of highly invigorating material and of pure quality, although the prices

have so largely advanced," Ac. The Tribune just hits the nail on the head. The | Baratheas Plantation Bitters are not only made of pure material, but the people are told what it is. The Recipe is published around each bottle, and the bottles are not reduced in size. At least twenty imitations and counterfelts have sprung up. They impose upon the people once and that's the last of them.

The Plantation Ritters are now used in all the Covcriment Respitals, are recommended by the best physicians, and are warranted to produce an immediate beneficial effect. Facts are stubborn things. AUTOMATIC ORGANS! SCHOOL ORGANS,

MELODEONS:

35,000 Now in Use.

Every Instrument Warranted for 5 Y'rs

In presenting the Automatic Order, we beldly announce the greatest triumph in musical instruments of the age. During the past half century, the French and Germans have manufactured reed instruments with double bellows, and two pedals for the feet to operate, but the want of the reversed or Exhaustical Bellows, (which is the only bellows used in our instruments,) made it impossible for them to produce the mellow, rich and musical tone for which our instruments are celebrated. rich and musical tone for which our instruments are celebrated.

Another objection to this method of blowing was, that both feet being occupied, no opportunity was offered for the management of the swell. Within the past two years instruments constructed on this European plan of "double blowers," have been manufactured in this country, and to counteract this difficulty (want of a swell) a lover has been projected from the centre of the instrument, to act upon the swell, and operated by the instrument, to act upon the swell, and operated by the first object, are disagreeable enough to a gentleman, but to a lady the use of such an appendage is nearly impossible.

Our auromanic device obtistes this difficulty entirely, the simple act of blowing with more or less force giving the desired increase or decrease in the volume of tone.

of tone.

For seventeen years the superior excellence of our Melodeons has not been questioned, and for two years past the enormous demand has made it impossible for us to meet our orders promptly. With our increased facilities, we feel warranted in assuring our patrons that their orders will be promptly met, and solicit a continuance of their patronage. Knabs & Co., it is impossible not to bear testimony to their qualities, which have acquired for them the eminent reputation which they onjoy. The Pianos of their manufa ture, on which I have played, are exceedingly remarkable for their qualities. The bass is powerful without harshness, and the upper notes sweet, clear and harmoniously mellow, (chrystaline,) and I do not hesitate to express in regard to these instruments my entire satisfaction, and to declare that they are equal of not superior to the best manufactured in Europe or this country by the most celebrated makers.

WEDNESDAY, DEC. 7, 1864.

The President's Message. Waanticipato tho usual time of publiention by several hours to-day, in order to lay before our readers the annual Message of President Lincoln which was sent to Congress yesterday afternoon. It is safe to say that no message of any former President was ever looked for with as much solicitude and ourosity, as the one which is published herowith. No former message was written under such peculiar and important oircumstances. While the nation was convulsed with internal dissensions, and the whole continent felt the parthousko shook of contending armies, a highly excitable people were called upon to pronounce direct judgment upon the policy of the government in the past, and indicate the future course which they desire their public servants to pursue. And after the exciting canvass is over; both the friends and the enemies of the re-elected Chief Magistrate, are anxious to see how far he is to be governed in his administrative policy by the wishes of the majority, and whether or not he will have any regard for the opinions of that large class of persons who protested against his election at the ballot-box. We believe the Message will please all classes of honest, national men who really desire the perpetuity of our republican institutions and the triumph of law and order over rebellion and discord. While he indicates his purpose to firmly pursue the official path pointed out to him by the commanding voice of an overwhelming majority of free--mon, at the same time he treats the opinions and feelings of his opponents with the same high respect and deference that has always characterized the conduct of Abraham Lincoln. Upon the great subject of domestic slavery, and the questions incident thereto, the Message preaches nothing incompatible with the pure gospel of liberty and universal freedom to all mankind. While the nation has reason to thank God that the people had virtue enough to stand firm in the true faith during the terrible crises through which we have been so rapidly passing, let them remember also, in their thankfullness that we have a President who will carry out their wishes, and who takes no steps backward, however slow we may think him in going forward. In these days of long-winded and ver-

bose statesmen, the Message is a remarkably brief document, and is so simple and plainly put, that he who runs may rend. and reading, may understand. We commend it to the reader's attentive perusal, deferring further comment to another day.

Dear Sin:—I have been afflicted many years with severe presenting crange in my Umies, cold feet and hands, and a general disordered system. Physicians and medicine failed to relieve me. Some friends in Now York, who were using Plantation Litters, prevalled upon me to try them. I commenced with a small wine-glassfull after dinner. Feeling better by degrees, in a few days I was astemished to find the coldiness and cramps had entirely left me, and I could sleep the night through, which I had not done for years. [Seel like another belog. My appetts and strength have also greatly improved by the use of the Plantation Bitters. Respectfully, JUDITH RUSSEIL.

COTTSCHALK ON KNABE. .[Translated from the French.] [Translated from the French.]

After having played on the Plano of Messrs. Knabe

& Co., it is impossible not to bear testimony to their
qualities, which have acquired for them the ordinent
reputation which they only. The Planos of their
manufacture, on which I have played, are exceedingly
remarkable for their, qualities. The bass is powerful
without hardness, and the upper notes sweet, elear
and harmonicusly mellow, (chrystaline,) and I do not
hesitate to express in regard to these instruments my
entiresatisatedion, and to declare that they are squal
if not superior to the best manufactured in Europe or
this country by the most nelebrated makers.

by a new method, and with remedies that are eminently successful in the above class of chronic diseases.

The thinking and unbiased portion of the community will appreciate the great advantage of a permaent and voliable Institute for the cure of chronic diseases that usually halfile the skill of the general practitioner.

Catarch, that great premeding cause of Consumption in the Northwest always gives way upon a philostion of the new remedies. Dr. Hale has nover encantreased a case of this disease he could not cure. The present season is very favorable for applying proper remedies; delays are dangerous. Your case may be cured this month, not next, to-day, not to-necrow.

is very favorable for applying proper remedies; delays are dangerous. Your case may be cared this month, not next, to-day, not to-morrow.

All who are suffering from any of the diseases Dr. Halo makes a speciality in treating, should at least call and breatigate the new system for themselves. No person of good sones and sound judgment will, without full and careful investigation, denounce as "humbug" that which claims to peases merit.

EDr. Hale takes pleasure in referring to the following responsible parties, citizens of Janewille; who can speak knowingly as to the officacy of Dr. Hale's treatment, not to mention hundreds of others in the Northwart that have been cured:

M. Schayier, proprietor of the Schuylor House, Dewitt Davis, N. & Kwaiston, D. R. Stout, F. J. Tappor Ellis Doty, job printer, J. D. Hayner, W. H. Mana, E. R. Beckley, N. Kowe, John Korr, J. F. Drake, Wm. Hyzer, Mrs. W. W. Wheeler, Mrs. G. J. Chenvy, Miss Bello Shattack, Miss N. Wiley.

Gentlemen:—Having stated it verbally to you, I have no hesitation in writing the fact, that I experienced marked benefit from your Hoofland's German Bitters. Durling a long and tedious session of Congress, pressing and onerous duties nearly prostrated me. A kind friend suggested the use of the preparation I have named. I took his advice, and the result was improvement of beatth, proceedings and the particular BOOKS, STATIONERY, PAPER HANGINGS, &C. Also, SPECIAL AGENT for

Sewing Machines.

WILCOX & GIBBS. SEWING MACHINE!

Will Stitch, Hem, Fell, Tuck, Cord, Bind, Braid, Quilt and Embroider beautifully. It will, with the finest needle and thread, run from perfect work on the finest Nainsook, over the heaviest beaver cioth and owhide, with no change of needle, thread or tension.

Wilcox & Gibbs Sewing Machine fect produced by the use of Hoofland's German Bitters in my family, I have no healtation in saying that it has been highly beneficial. In one instance, a case of dyspepsia of thirteen years' standing, and which had become very distressing, the use of one bottle gave decided relief, the second effecting a cure, and the third, it seems, has confirmed the cure, for there has been no symptoms of its return for the last six years. In my individual use of it, I find it to be an unequiled tonic and sincerely recommend its use to the sufferers.

Truly yours,

JACOB BROOM, 1707 Spruce. will use coarse cotton. linen, silk and twine. It runs easier, fuster and stiller than any other machine. It forms a flat, even and clastic seam, differing from every other stitch, each loop being fwirted by means of the

GROTATING HOOK,"

and drawing the twist into the goods, thus securely and drawing the twist into the goods, thus securely fastening every stitch, so that the seam will bear to be cut at frequent intervals, and in that case oven, the seam is warranted NOT TO BIF in wear, and under all circumstances to "survive the weakhub." Old worn out family garments, bosoms, pants, dresses, &c., have been submitted to Committees at Pairs where was the greatest competition, and to this stitch premiums have been awarded for its superiority, durability, glasticity and BEAUTY.

A Patented Dovice prevents the possibility of the ma-chine being run in the wrong direction, or the balance wheel over wearing or touching the dress. By another ingenious Patent improvement, The Needle Cannot be Set Wrong, Thus avoiding the great trouble of other machines. In

this it is so easy that a child may set it in the dark with unerring correctness every time. NO BREAKING OF NEEDLES. The blade of the needle is less than M of an inch long, and is straight. It is less than half the length of other machine needles, many of which are curved, there-

ore more easily bent or broken—a great source of an noyance, expense and trouble. The Hemmer and Feller can never be set wrong. Any one may adjust them in the dark. The hem may be of any width. No other hemmer or feller is like this. It turns the hem on the

right or upper side, as you want it. IT WILL NOT DROP STITCHES: As the needle is always set right, the blade short and straight does not vibrate, like longer ones.

Wilcox & Gibbs Sewing Machine Is run by steam at 4000 stitches per minute-other machines only at 400 to 1200, with safety. They are manufactured with

MATHEMATICAL PRECISION. ifence each part is interchangeable, and can be readily placed in case of accident.

THEY WILL NOT GET OUT OF ORDER We have known it intimately for soveral years. Many thousands are already in use here, and so far as we know, not one in family use has ever cost a dime to repair, or ever been out of order at all. They will last a generation, if properly cared for. None who have used it can be persuaded to use any other.

Works at an instant's notice, and never stops "unaccountably." Not one operator in ten on the Wilcox & Glibs will break a needle or drop a stifch in a year. The Wilcox & Glibs in the hands of any one, knows no "skips," "drops," "jumps" or "misses." The roundness, evenness, durability and beauty of its stifch

From the Hon. Thomas B. Florence.

Washington, Jan. 1st, 1864.

Gentlemen: —Having stated it verbally to you, I have no hostitution in writing the fact, that I experienced marked benefit from your Hoofand's German Bitters. During a long and tections easien at Congress, pressing and ouerous duties nearly prostrated me. A kind friend suggested the use of the preparation I have named. I took his advice, and the result was improvement of health, renewed energy, and that particular relief I so much needed and obtained. Others may least fully advantaged if they desire to be. e similarly advantaged if they desire to be.
Truly your friend, THOMAS B. FLORENCE. From John B. Withersham, Esq., firm of

Withersham and Hurchinson, the colourated manufacturers of fancy Iron Works, 250 Canal street:

I am the recipient from you of one of the greatest favors that can be conferred upon man, viz., that of health. For many years have I suffered from one of the most annoying and debilicating complaints that the human lamily can be afflicted with, Chronic Discribers. Diarrhore.

Draing the long time I was suffering from this discase, I was attended by regular physicians, giving me
but temporary relief. The cause seemed to remain
until I was beduced to try Hoeffland's German Ditters.
After the use of a few better of that valuable medicine, the complaint appeared to be completely eradi-

ated.

I often inwardly thank you for such a valuable specific, and, when I have an opportunity, cheerfully recommond it, with full confidence in its reliability.

Truly yours. JOHN B. WITHERSHAM.

From Julius Lee, Esq., firm of Lee & Walker the most extensive Music Publishers in the United States, No. 722 Chestaut street, Philadelphia. States, No. 722 Chestnut street, Philadelphia.

Mesers, Jones & Evons—Gentlemen: My mother-iniaw has been so greatly benefitted by your Hooliand's
Gorman Bitters: that I concluded to try it myself. I
find it to be an invaluable tonic, and unlessitutingly
recommend it only who are suffering from dyspepsia.
I have had that disease in its most obstinate form—
flattiones—for many years, and your Betters has given
mu case when everything else had failed.

Yours truly.

JULIES LEE.

From the Hon. Jacob Broom. Continuen:—In reply to your inquiry as to the effect produced by the use of Hooffand's German Bitters in my family, I have no hesitation in saying that it has been blighly beneficial. In one lustance, a cuse of dyspessia of thirteen years standing, and which had become very distressing, the use of one bottle gave decided relief, the second effecting a cure, and the third, it seems, has confirmed the cure, for there has been no symptoms of its return for the last six years. In my individual use of it, I find it to be an unequiled toulc and sincerely recommend its use to the sufferers.

Truly yours, JACOB BROOM, 1707 Spruce. PHILADELPHIA, Oct. 7th, 1863

PHLADZIPHA, December 26th, 1883.

Mestrs. Jones & Ebans—Gentlenen: I have recently been laboring under the distressing effects of indigestion, accompanied by a prestration of the nervous system. Numerous renedles were recommended by friends, and some of them tested but without rollef. Your Hoofand's German Bitters were recommended by persons who had tried them, and whose favorable monition of the Bitters induced me also to try them. I must confess that I had an aversion to Patent Medicines, from the "thousand and-one" quack "Bitters," whose only aim seems to be to pain of sweetened and drugged liquor upon the community, in a sly way; and the tendency of which, I fear, is to make many a monifermed drugkard. Upon learning that yours was really a medicinal preparation, I took it with happy effect. Its action not only upon the stomach, but upon the nervous system, was prompt and gratifying. I feet that I have derived great and permanent benefit from the use of a few bottles.

Dr. Jackson—Dear Sir.: I feel it due to your excelout preparation, Hooland's German Bitters, to add my testimony to the deserved reputation it has obsained. I have for years, at times, been troubled with the stream in my head and never servers. I WAS mined. I have for years, at times, been troubled with great disorder in my head and nervous spatem. I wandvised by a friend to try a bottle of your Gornas Hitters. I did so, and have experienced great and mexpected relief; my health has been very materially benefitted. I confidently recommend the article when I meet with cases similar to my own, and have been assured by many of their good effects.

SEWING MACHINE! Will Silich, Hem, Fell, Tuck, Cord, Bind, Braid, Quilt and Embroider transfully. It will, with the finest needle and thread, run from perfect work on the finest Nainsook, over the heaviest beaver cotton and cowhile, with no change of needle, thread or tension. Wilcox & Gibbs Sewing Machine

will use coarse collon. Hnen, silk and terine. It runs easier, faster and stiller than any other machine. It forms a tlat, even and ulattic seam, differing from every other stitch, each loop being twisted by means of the

and drawing the twist into the goods, thus securely fustening every stitch, so that the seum will bear to be cut at frequent intervals, and in that case oven, the ceah is warranted nor to RF in wear, and under all circumstances to "survive the toashtid." Old wore out family garmouts; bosoms, punts, dresses, E.C., have been submitted to Committees at Fairs where was the greatest convedition and to trus strices premiums have been st competition, and to this stitch premiums have been warded for its superioritt, durability, elasticity and Reader.

A Patented Device prevents the possibility of the machine being run in the wrong direction, or the balance wheel ever wearing or touching the dress. By another ingenious Patent Improvement,

Thus avoiding the great trouble of other machines. In this it is so easy that a child may set it in the dark with unerring correctness every time. NO BREAKING OF NEEDLES. The blade of the needle is less than % of an inch long, and is straight. It is less than half the length of other machine needles, many of which are curved, therefore more could bent or broken—a great source of an organe, expense and trouble. The Hommer and Feller care nover be set wrong. Any one may adjust them in the dark. The hom may be of any width. No other hommer or feller is like this. It turns the hem on the right or upper side, as you want it.

The Needle Cannot be Set Wrong.

IT WILL NOT DROP STITCHES;

As the needle is always set right, the blade short and straight does not vibrate, like longer ones. Wilcox & Gibbs Sewing Machine Is run by steam at 4000 stitches per minute—other machines only at 400 to 1200, with safety. They are manufactured with

MATHEMATICAL PRECISION, Honce each part is interchangeable, and can be readily placed in case of accident. THEY WILL NOT GET OUT OF ORDER We have known it intimately for several years. Many thousands are already in use here, and so far as we know, not one in family use has ever cost a dime to repair, or ever been out of order at all. They will last a generation, if properly cared for. None who have used it can be persuaded to use any other.

Wilcox & Gibbs Sewing Machine Works at an instant's notice, and never stops "unne-countably." Not one operator in ten on the Wilcox & Gibbs will break a needle or drop a stich in a year. The Wilcox & Gibbs in the hands of any one, knows no "skips," "drops," "jumps" or "misses." The roundness, overness, durability and heauty of its stitch

WERE NEVER EQUALED.

Its rapidity, absolute stillness, case of motion, narrowness and neutroes of its Hom and Fell were never approached by any other muchine. We can call in any loy or girl from the street, and with three minutes instruction they will set the needle, attach the Hemmor, or Foller, and do the work with entire success. A blind girl, with the exception of threading the needle, can do the same.
